

CNE (Novell)

If you work in the I.T. industry -- or if you'd like to -- pursuing Novell certification is the smartest thing you can do for your career. As a Certified Novell Professional, you enhance your on-the-job performance. You are more effective at managing network environments than non-certified employees. And, you improve your company's overall networking proficiency. Demand for computer networking skills is strong and growing daily all over the world, opening new career opportunities for you. Novell certification is the credential you need to succeed.

As a Certified Novell Professional you are qualified to support Novell-specific products as well as non-Novell products. Novell's certification curriculum is 50% industry generic -- giving you the skills to competently support multivendor networking products.

Obtaining your CNE will give your employer confidence that your abilities have been tested. You will increase your personal productivity and workgroup performance. You will be able to optimize the technology features and get a better return on your company's investment in Novell software.

While you pursue Novell certifications, you have access to online benefits (listed below) that help you successfully complete certification. After you become a Certified Novell Professional, your online benefits keep your certification skills sharp and keep you in touch with industry changes and events.

Novell certifications are recognized worldwide as the standard of excellence for supporting Novell's Internet, network and groupware products. Novell certifications give you the skills to support the computer network industry. Training and testing centers for Novell certifications are available worldwide.
