

Career Tracks

A+ Certification (Hardware and Operating System)

is the most basic qualification an individual can earn to begin building a strong foundation in understanding, diagnosing, repairing, upgrading and installing microcomputers and its associated technologies. Earning this certification means that the individual possesses the knowledge and skills essential for an entry-level computer service technician job. However, most technician jobs don't constitute a career position.

Network+ Certification (Networking Basics Certification)

is the novice course intended as a path for entering into networking. Earning this certification indicates that a candidate possesses the knowledge needed to configure and operate a variety of networking products. Network+ is a great introductory course (but is not necessary) to any of the career tracks in networking such as the MCSE (Microsoft Certified Systems Engineer) or CNE (Certified Novell Engineer).

MCSE (Microsoft Certified Systems Engineer)

is the premier certification for networking specialists who plan, design, implement and support information systems based on the Microsoft Windows operating system and server software. Currently, there is an abundance of MCSE positions available worldwide, with salaries ranging anywhere from \$48,000 to \$100,000 annually, depending on the company's location and functionality.

MCSA (Microsoft Certified System Administrator)

is the premier certification for professionals who implement, manage and troubleshoot existing network and system environments based on the Microsoft Windows operating system and server software. Earning this certification offers IT professionals a competitive edge in today's changing business environment by validating specific experience required of a network or system administrator.

CCNA (Cisco Certified Network Associate)

is the first certification in the line of Cisco Certification tracks. The CCNA program was created to provide a solid introduction not only to Cisco technologies but internetworking in general. This certification is a great marketability add-on for individuals looking to advance their skills in the IT industry. Contact us for more information about our services.
