

## MCITP Server Administrator

The Microsoft Certified I.T. Professional - Server Administrator credential is a leading certification for Windows Server 2008, providing widely recognized, objective validation of your ability to perform critical, current I.T. job roles by using Microsoft technologies to their best advantage. Now you can distinguish yourself as an I.T. professional with the current skills and proven job-role capabilities to work effectively in a Microsoft network environment. Award winning laptop based training combined with instructor led labs and certification specific lectures allow you to study at your own pace working individually with the instructors and mastering each and every concept as you move thru the training. Scenario based labs for hands on training are available in our state of the art training centers Monday through Saturdays.

Each course contains in-depth theory, informative graphics, hundreds of test questions and hands-on exercises for a learning experience that surpasses traditional training. The Microsoft Certified Information Technology Professional - Server Administrator certification is a technical and demanding certification that creates career level income and opportunity in the Information Technology career field. The Server Administrator certification will help you develop and validate your skills in your current position, or propel you toward a future role, such as: Windows Server Administrator; Server Systems Administrator; Monitoring Operator; or Network Administrator. Candidates for this certification are I.T. professionals who want to be known as leaders and problem solvers in a current or future role in an organization that uses Windows Server 2008. Package it with the MCSE or MCSA certifications and become a leader in the I.T. Industry. Computer Training Academy (formerly LTS Career Training) prepares you to pass three exams administered by Microsoft and completed in our facility. **YOU WILL GET CERTIFIED!!** An average user computer background is helpful, although not required, we start you out at your level and move one concept at a time. The MCITP - Server Administrator Certification takes approximately three months to complete.
